Hero Landing

Eyebrow (small text above the title): An initiative by Ashoka University's Centre for Social and Behaviour Change

Headline: Moonshot Philanthropy Summit

Tagline: Exploring how *Moonshot Thinking* × *Behavioural Science* × *AI* leads to *Transformation at Scale*

Event line: Tuesday, 6 October 2026 · 4:00 PM to 7:00 PM, followed by drinks and conversations · IFBE, Ballard Estate, Mumbai · By invitation only

Primary CTA: Request an Invite

Secondary CTA: View the Agenda

One-line hero support text (below the Request an invite button): If you're a CSR Head, managing a family office's philanthropy or leading an NGO - apply to be one of the 50 selected minds to engage in this conversation.

Section label: Why Attend

Body copy (three short paragraphs):

What would it take to build the solutions our future needs?

India's most critical challenges, from climate change to financial inclusion to preventive healthcare, have not stalled for lack of funding or intent. They have stalled because incremental approaches produce incremental results. The Moonshot Philanthropy Summit is built around a single conviction: that a moonshot approach, one defined by scale, radical innovation and a willingness to experiment, is what will move these challenges beyond incremental progress and toward genuine and future ready transformation.

The summit will also explore how behavioural science, amplified by AI, can help bold solutions be implemented at scale across India's complex and remarkably diverse population. And it intends to seed something the sector has never had: a new set of metrics and perspectives for CSR/Philanthropy decisions and frameworks that allow moonshot projects to take off in the first place. This is the need of the hour, as the world and our country enter a new era in which uncertainty, AI, accelerated climate change and rising inequality together reshape our very ways of life.

Three pillar cards (beneath the body copy):

Pillar	Copy
Think in Moonshots	Scale, radical innovation and a willingness to experiment. The problems are multi-layered; the solutions must be too.
Scale Through Science	Behavioural science and AI make ambitious ideas scalable across India's diverse languages, cultures, and lived realities.
Fund What Is Possible	New metrics and new frameworks for impact investment, built to reward ambition rather than only compliance.

Optional pull-quote strip (recommended, sits between this section and the agenda): "The reason breakthrough innovation is rare in India's development sector is not a lack of funding. It is a lack of funding structures that reward bold thinking."

Section label: Agenda

Heading: A call to think bigger, bet bolder !

Intro copy: Two hours, six movements. The evening unfolds as a single narrative, exploring why bold interventions matter, the evidence that they work, how AI can help scale them, how we should fund and measure them, and what the next decade could look like if we get it right.

Session cards. Each card: session name, format tag, two-line descriptor, speaker placeholder(s).

3.1 How behavioral science and AI can solve complex problems

Opening Keynote Why India's hardest challenges have plateaued, and what becomes possible when moonshot thinking converges with behavioural science and AI. The intellectual foundation for everything that follows.

Speaker: [Speaker Name], Director, Ashoka University's Centre for Social and Behaviour Change

3.2 Intervention to Impact: A Real Life Story

Live Case Narrative What a bold intervention actually changes on the ground, told first by the person whose life it changed, then decoded by the director who designed it. Moonshot impact is not a theory. It reaches real people and reshapes real lives.

Speakers: [Programme Beneficiary] · [Project Director, CSBC]

3.3 Why AI is an Amplifier

Live Brainstorming Session: A builder, an implementer and a technology thinker workshop in real time: what does it actually take for AI to carry bold interventions across India's complexity of language, infrastructure, trust and culture? Not a rehearsed panel. A working session in real time.

Panellists: [Founder, AI Start-up] · [Head, Leading NGO] · [Opinion Leader on Technology]

3.4 Reimagining Metrics

Panel: If moonshots need a new funding structure, they need a new measure of success. A storyteller, a CSR insider and a venture capitalist on metrics that capture transformation rather than only output, and on portfolios that satisfy the board while backing the bold.

Panellists: [Leader, Media and Creative Enterprise] · [CSR Committee Leader, Large Corporation] · [Venture Capitalist]

3.5 The Future We Can Build

Keynote · Vision Lab A vivid, specific picture of what five to ten years of moonshot investment could build in India's most critical cause areas. Ambitious, grounded in current research trajectories, and closer than you think.

Speaker: [Speaker Name]

3.6 Closing Keynote

Keynote A founder who has built at scale on the asymmetric bet: why this is the moment for India's philanthropic capital to move from safe, incremental giving to bold, catalytic investment.

Speaker: [Established Founder and Entrepreneur]

Agenda footer line: 7:00 PM onwards · Drinks and Conversations

4. Speakers and Facilitators (replaces scaffolding's "Mission Crew")

Section label: Speakers

Heading: Speakers and Facilitators

Sub-heading: The people shaping the evening

Intro copy: Scientists, builders, funders and storytellers, each chosen because they have already made the kind of bet this summit argues for. The speaker line-up is currently being finalised and will be updated on a rolling basis

Speaker cards (photo, name, title, one-line summit role). All placeholders:

Card	Name	Title line	One-line summit role
1	[Speaker Name]	Director, Ashoka University's Centre for Social and Behaviour Change	Opens the summit with its central thesis
2	[Speaker Name]	Founder, AI Start-up	The builder's view of AI for impact
3	[Speaker Name]	Head, Leading NGO	The ground truth of scale
4	[Speaker Name]	Opinion Leader on Technology	The paradigm shift, and its guardrails
5	[Speaker Name]	Leader, Media and Creative Enterprise	Why narrative is a metric
6	[Speaker Name]	CSR Committee Leader, Large Corporation	Compliance and courage, together
7	[Speaker Name]	Venture Capitalist	The moonshot investment thesis
8	[Speaker Name]	Vision Lab Keynote	The future we can build
9	[Speaker Name]	Established Founder and Entrepreneur	The closing call to action

5. About (scaffolding: three-part section)

Section heading: The Summit and the people behind it

6.1 About the Summit

The Moonshot Philanthropy Summit is convened by Ashoka University's Centre for Social and Behaviour Change to ask a bigger question of Indian philanthropy: what would it take to build the solutions our future needs? Over one curated evening in Mumbai, it brings funders, founders, scientists and policymakers into a single conversation about moonshot interventions, the science and technology that can scale them, and the investment frameworks that can fund them.

This is not a traditional conference. It is a working room: live case narratives, real-time brainstorming and a shared ambition to move India's philanthropic capital from incremental giving to catalytic investment.

6.3 Ashoka University's Centre for Social and Behaviour Change

The Centre for Social and Behaviour Change at Ashoka University works at the frontier of behavioural science and its application to India's most pressing development challenges. Its teams combine rigorous research, evidence-based behavioural design and emerging AI tools to build interventions that change outcomes at population scale, in areas spanning health, nutrition, financial inclusion and beyond.

7. Request an Invite

Heading: Request an Invite

Sub-heading: Reserve your seat at the table

Copy: The summit is invite-only and curated. Around the table: CSR heads of India's largest corporations, ultra-HNI philanthropists, family office leaders, foundation heads and a small number of policymakers, scientists and builders.

A room of decision-makers, builders, and collaborators, united by the ability to turn ideas into action.
